## Electric saws with widia chain

**For cutting light construction materials, for modifications, openings, adjustments and restoration.**

The COMER E21 and E23 manual electric saws for the building industry are the result of COMER's experience in the field of dry cutting of all light construction bricks. They represent a safe and reliable tool for the user, guaranteeing a fast and precise cut, without dust and waste of material, leaving the cut part ready for installation, thus having an excellent saving of material.

COMER electric saws are particularly suitable for cutting in mortar joints, for opening doors and windows, for finishing compartments and in any case where immediate intervention on site is required, on bricks such as Poroton and Alveolater, Gasbeton, Ytong, Siporex, Eraclit, Tufts and expanded cellular concrete and similar. The low number of revolutions avoids dangerous kickbacks.

	E 21	E 23
<b>motor type</b>	single-phase double insulation	single-phase double insulation
<b>voltage</b>	230v-50hz	230v-50hz
<b>power</b>	1800w/2.5hp	2300w/3.1hp
<b>number of revolutions</b>	2000 g /1'	2400 g /1'
<b>weight without bar and chain</b>	7.5 kg	7.6 kg
<b>motor protection switch</b>	equipped with thermal switch manual motor protector	equipped with thermal switch manual motor protector
<b>dimensions</b>	880x190x320 mm	880x190x320 mm
<b>safety</b>	chain brake safety	chain brake safety
<b>pinion pitch</b>	404	404

**STANDARD EQUIPMENT:**

- > bar, bar cover and chain
- > tool bag and use and maintenance booklet

**Chain saw E21 (1800 w)** **cm 43**  
with roller bar and chain MM

**Cod. EE21-IR10**

**Chain saw E21 (1800 w)** **cm 53**  
with roller bar and chain MM

**Cod. EE21-IR11**

**Chain saw E23 (2300 w)** **cm 43**  
with roller bar and chain MM

**Cod. EE21-IR12**

**Chain saw E23 (2300 w)** **cm 53**  
con barra rullo e catena MM

**Cod. EE21-IR13**
